

I am sending this in hope that you will reject the NAB's petition 04-160 and support XM satellite radios's ability to provide the service that I choose to pay for and like receiving. This country is about fair competition and choice. XM subscribers made a choice to pay to receive this service, this is saying that we are not 100% satisfied with radio stations provided in our areas. I believe competiion makes the market continue to strive to improve the quality of their service.
